

**First Way:** Filter>Distort>Free Distort (or Effect>Distort>Free Distort) and pull handles (not as symmetrical)

**Better Way:** With text (convert to outlines first) or object—

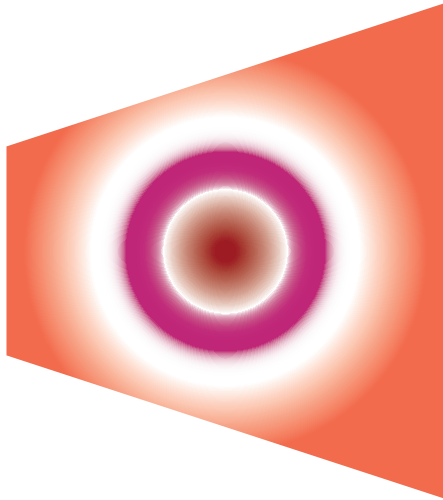

1. With text or object selected, grab Free Transform Tool.

2. Position double-headed cursor over bottom right corner handle of bounding box.

3. Start to drag DOWN or UP (left or right does not work!)

AND THEN hold down Shift/Option/Command keys while pulling.

NOTE: Let go of mouse first, then let up on toggle keys! Also, it does not 3D so well.

TEXT Perspective
